

Giovanni Antonio Vázquez Rangel

Desarrollador Fullstack (JavaScript / TypeScript)

Tijuana, Baja California, Mexico / giovazquezrangel@gmail.com / 663-320-4116 / <https://codebygio.pro> | <https://www.linkedin.com/in/giovanni-vazquez-rangel/>

Professional Summary

Full Stack Developer with 3+ years of experience building scalable web applications using React, Node.js, and microservices architecture. Proven track record leading the implementation of critical modules, optimizing performance, and developing APIs for high-volume data systems. Currently seeking to grow into a mid-level role with greater impact on architecture and technical decision-making.

Education

Universidad Tecnológica de Tijuana Bachelor's Degree in Information Technology Aug 2018 – Apr 2022

- Specialization in Multiplatform Web Development

Experience

Full Stack Developer – G-Global, Tijuana Dec 2021 – Feb 2025
Proyectos: WMS y

Globalization

WMS – Microservices Architecture (React, Node.js, MoleculerJS, TypeScript, MongoDB)

- Led the implementation of 10+ critical full stack modules impacting inventory and daily operations
- Refactored microservices from JavaScript to TypeScript, improving maintainability, reducing runtime errors, and enabling scalability
- Optimized complex MongoDB queries (aggregations, lookups), reducing response times by up to 40%
- Built real-time monitoring dashboards in React used by operational teams
- Redesigned interfaces in collaboration with product teams, improving usability and reducing friction in key workflows
- Optimized API consumption and frontend state management (re-render control, caching), improving perceived performance
- Implemented unit testing using TDD, reducing production issues
- Automated internal processes using Python (data migration and cleanup), reducing manual workload

Impact:

- Improved operational efficiency by 20–30%
- Reduced production incidents after refactoring
- Increased dashboard usability and adoption by internal teams
-

Globalization – Monolith with GraphQL(React, Next.js, NestJS, TypeScript, MongoDB)

- Designed and implemented GraphQL APIs (resolvers, validations, access control)
- Implemented SSR with Next.js, improving performance and initial load times
- Refactored hydration in Next.js, reducing server-client inconsistencies
- Optimized rendering and state management for data-heavy views
- Collaborated with product and design teams to improve UX and reduce user interaction steps
- Built data aggregation scripts and migration tools across environments (dev, QA, staging, production), ensuring data consistency

Key Achievements:

- Active participation in CI/CD pipelines and continuous deployments
- Contributed to architectural decisions and technical improvements
- Supported sprint planning with technical and design improvement proposals
- Conducted code reviews, promoting best practices and code quality
- Provided mentorship and technical guidance to team members
- Improved user experience and efficiency in critical application workflows

Frontend Developer Intern – JD Group, Tijuana

Mar 2021 – Nov 2021

- Contributed to the redesign of internal administrative dashboards
- Developed reusable components to improve frontend consistency
- Enhanced user experience across internal tools

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Node.js, Python

Frontend: React, Next.js, Tailwind CSS, Material UI

Backend: Node.js, NestJS, REST APIs, GraphQL, Microservices (MoleculerJS)

Databases: MongoDB, SQL Server, MySQL, PostgreSQL

Tools & DevOps: Git, GitHub, CI/CD, AWS S3

Methodologies: Scrum, Agile, Test-Driven Development (TDD)

Languages

Spanish: Native

English: Intermediate (B1)
